

Alfardil Alam

Bronx, NY | (917) 399-4480 | alfardil.alam@nyu.edu | github.com/alfardil | linkedin.com/in/alfardil

EDUCATION

New York University, New York, NY

May 2027

B.A. Computer Science and Mathematics

Awards: Presidential Scholarship | Winner Hack@Brown 2025 | Winner BYTE Hacks 2025

Coursework: Data Structures & Algorithms, Operating Systems, Software Engineering, Parallel Computing, Linear Algebra, Natural Language Processing, Object-Oriented Programming

EXPERIENCE

Visa | Austin, TX

May 2026 – Aug 2026

Software Engineer Intern

- Engineered a production legal-research RAG platform using FastAPI that grounds every answer with citations, eliminating hallucinated legal claims and reaching over 90% RAGAS faithfulness and context precision across a 200+ row evaluation set.
- Led allocation of disparate internal documents into a centralized data lake, collaborating across the legal team to power custom FastMCP tools that query and deliver context directly into the retrieval pipeline.
- Cut regulatory-research effort by 83% for counsel, legal ops, and compliance teams by building a Next.js interface and an email-based Q&A that replies straight to their inbox, removing the need to context-switch to a separate platform.

NYU Vertically Integrated Projects | New York, NY

Jan 2025 – May 2026

Research Assistant

- Designed the setup command for an open-source supply chain security tool used by Bloomberg to abstract complex cryptographic key management and policy provisioning to reduce developer onboarding time by over 90%.
- Devised a temporal audit logging system using Next.js and PostgreSQL that tracks state changes (device allocation, MAC addresses), enabling administrators to reconstruct historical system states and detect malicious activity across 300+ user profiles.
- Restored frontend stability by resolving critical routing failures and broken links within the React codebase, significantly reducing onboarding difficulty for new developers and ensuring reliable access to the staging environment.

Lexor Strategies | New York, NY

May 2025 – Sep 2025

Software Engineer Intern

- Architected a consumer-facing rental marketplace using React and Redux, integrating Mapbox GL for geospatial radius search and Firebase for real-time roommate matching, directly securing the first 20+ customer conversions.
- Built a CRM analytics platform featuring ECharts for data visualization, configuring Netlify CI/CD to handle deployments with a reverse proxy integration and automated scheduled tasks for data synchronization.
- Expanded the digital footprint for Glow Sauna Studio (16k+ followers) by developing a React Native app that integrates Mind-bodyAPI for seamless multi-location bookings, simultaneously securing user data by patching a high-severity OAuth vulnerability.

PROJECTS

CodeBloom

codebloom.patinanetwork.org

- Developed a competitive coding platform using React & SpringBoot, allowing college students to track & compare LeetCode progress on a real-time leaderboard with the goal of providing motivation to the community.
- Reverse engineered & integrated GraphQL queries from *leetcode.com* to access data programmatically and bypass rate-limiting of existing APIs. Tracked 20,000+ questions with 260+ users and 40+ stars on Github.
- Optimized custom SQL queries to create RESTful API endpoints, custom objects, and database models to store and retrieve data efficiently through Postgres. Set up cron jobs to regularly fetch data.

SKILLS

- Languages:** Java, Python, TypeScript, Golang, C, C++, Swift, Bash
- Development:** React, Next.js, Node.js, Vite, React Native, Vercel, Express.js, Flask, Spring Boot, Github Actions, JSON, gRPC, CI/CD
- Database:** PostgreSQL, SQLite, Redis, Firebase, MongoDB, Neon, DrizzleORM, Prisma, Flyway, DBeaver, DataGrip
- Others:** Git, Docker, Kubernetes, AWS, Azure, DigitalOcean, OpenAI, Langchain, Stripe, Postman, VSCode, Maven, Google Cloud

LEADERSHIP

Captain, Men's Ultimate Frisbee

Sep 2021 – Present

- Managed \$25k in funding while coordinating travel, accommodations, and game schedules for 20+ athletes across multiple out-of-state tournaments; boosted team visibility through social media content attracting 80k+ views & 500+ followers.
